

Step-by-Step

Instructions for Shipping success

01

Trim, Wrap & Secure

Trim all stems with scissors or garden sheers at a 45 degree angle. Wrap the stems in a wet paper towel and secure to the flowers (plastic bag, tape etc.) but do NOT wrap the petals or greenery in the paper towel or plastic.

02

Packaging

Pick a box with plenty of space for the flowers but also enough room to cushion the flowers with plenty of news paper/dry paper towels.

03

Shipping Provider

Tape and label your box for shipping. We recommend UPS overnight shipping to ensure your flowers stay fresh!

04

Tips for Success

Use a smaller box, nestle it in the bottom of your bigger box, tape it down, and cut an 'X' in it. This is your personal flower holder to keep that bouquet upright during it's journey.
